KANSAS Communities That Care Student Survey

DISTRICT SUMMARY REPORT

2015-16

SAMPLE DISTRICT

Introduction

The Kansas Communities That Care (KCTC) Student Survey assessment is undertaken annually for use by schools, state agencies, counties, and communities in Kansas to monitor the incidence and prevalence of adolescent problem behaviors. Now in its 23rd year of administration, the survey is supported by the Kansas Department for Aging and Disability Services/Behavioral Health Services and is available to all Kansas school districts at no charge to support the healthy development of children. The Kansas framework expands the Communities That Care risk and protective factor model based on practical applications and experience concerning what places children and youth at risk, what buffers against those risks, and knowledge about how communities and systems change.

About This Report

This report summarizes findings from the 2015 Kansas Communities That Care (KCTC) Student Survey, administered to students in the 6th, 8th, 10th and 12th grades between December 1, 2015, and January 31, 2016.

More than 37% of eligible Kansas students participated in the survey in 2016. There were more than 55,300 surveys submitted from 191 districts compared to over 40,100 students in 206 districts in 2015. The participation rates for your district are presented below with comparisons to your county and the State of Kansas.

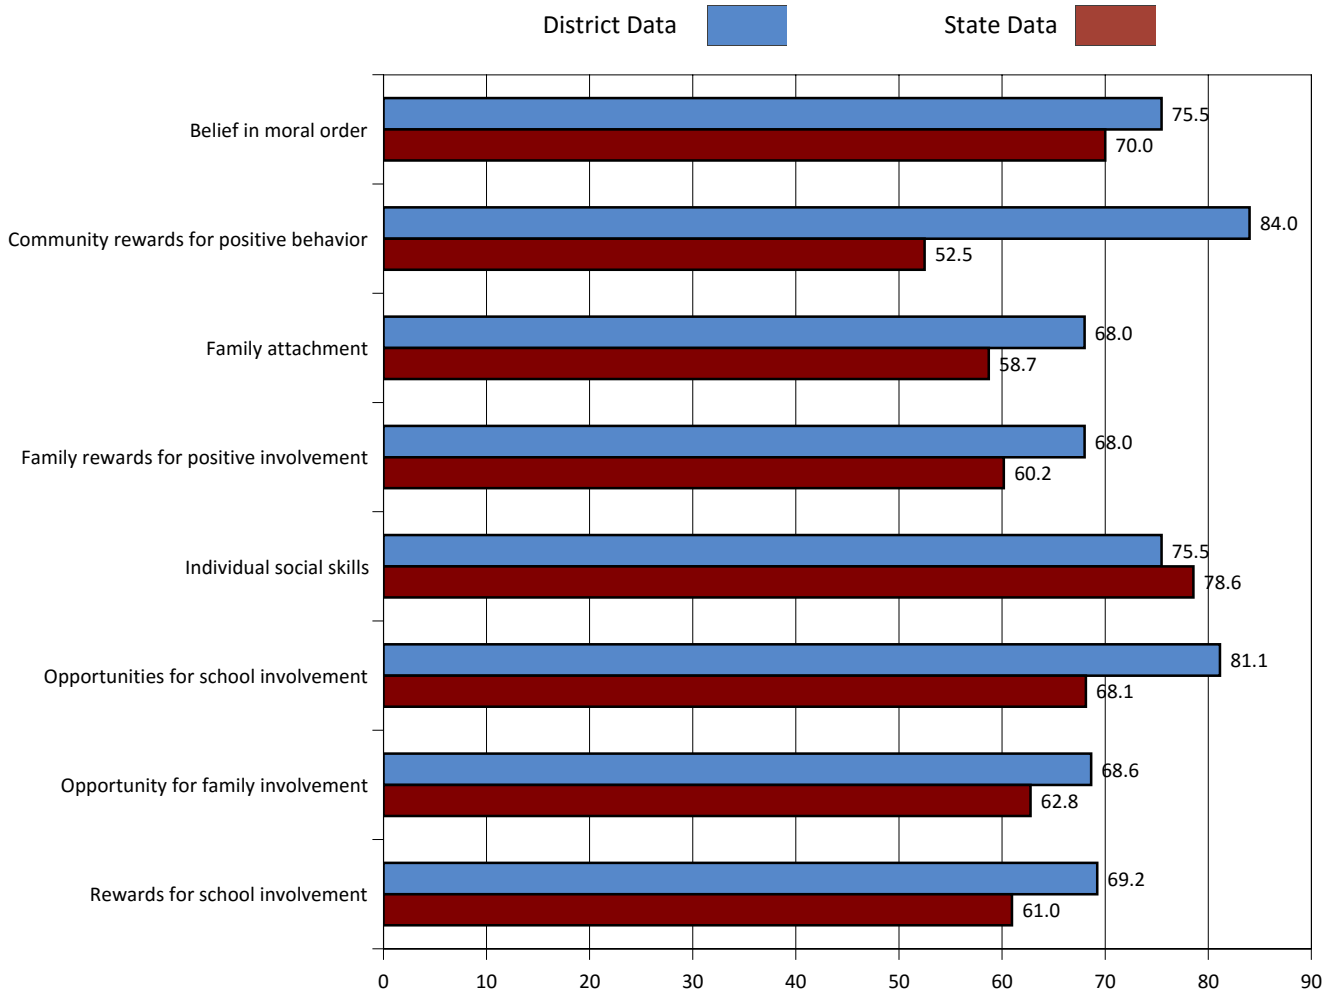
Districts can also access complete data and easily create customized reports from our website (www.kctcdata.org), comparing districts to county or state averages. You may view actual state, county and regional data (e.g. Judicial Districts), but in order to access specific district- or building-level data, a log-in password is needed. The password is provided only to superintendents to distribute at their discretion. If you need your password again, or have any problems accessing your data or need assistance navigating the website, please contact Nancy White (send an e-mail to nancy.white@greenbush.org or call 620-724-6281). In addition, we would be happy to create customized reports you may need.

	6th Grade:	8th Grade:	10th Grade:	12th Grade:	Total Participation:
District:	90.0%	76.9%	95.0%	88.2%	88.3%
County:	83.9%	86.4%	36.7%	28.0%	59.0%
State:	44.6%	44.6%	33.6%	26.7%	37.6%

In the next section of this report, you will find a Risk Factor Profile and a Protective Factor Profile to assist with evaluation of all the Risk and Protective Factor data from the Kansas Communities That Care Student Survey.

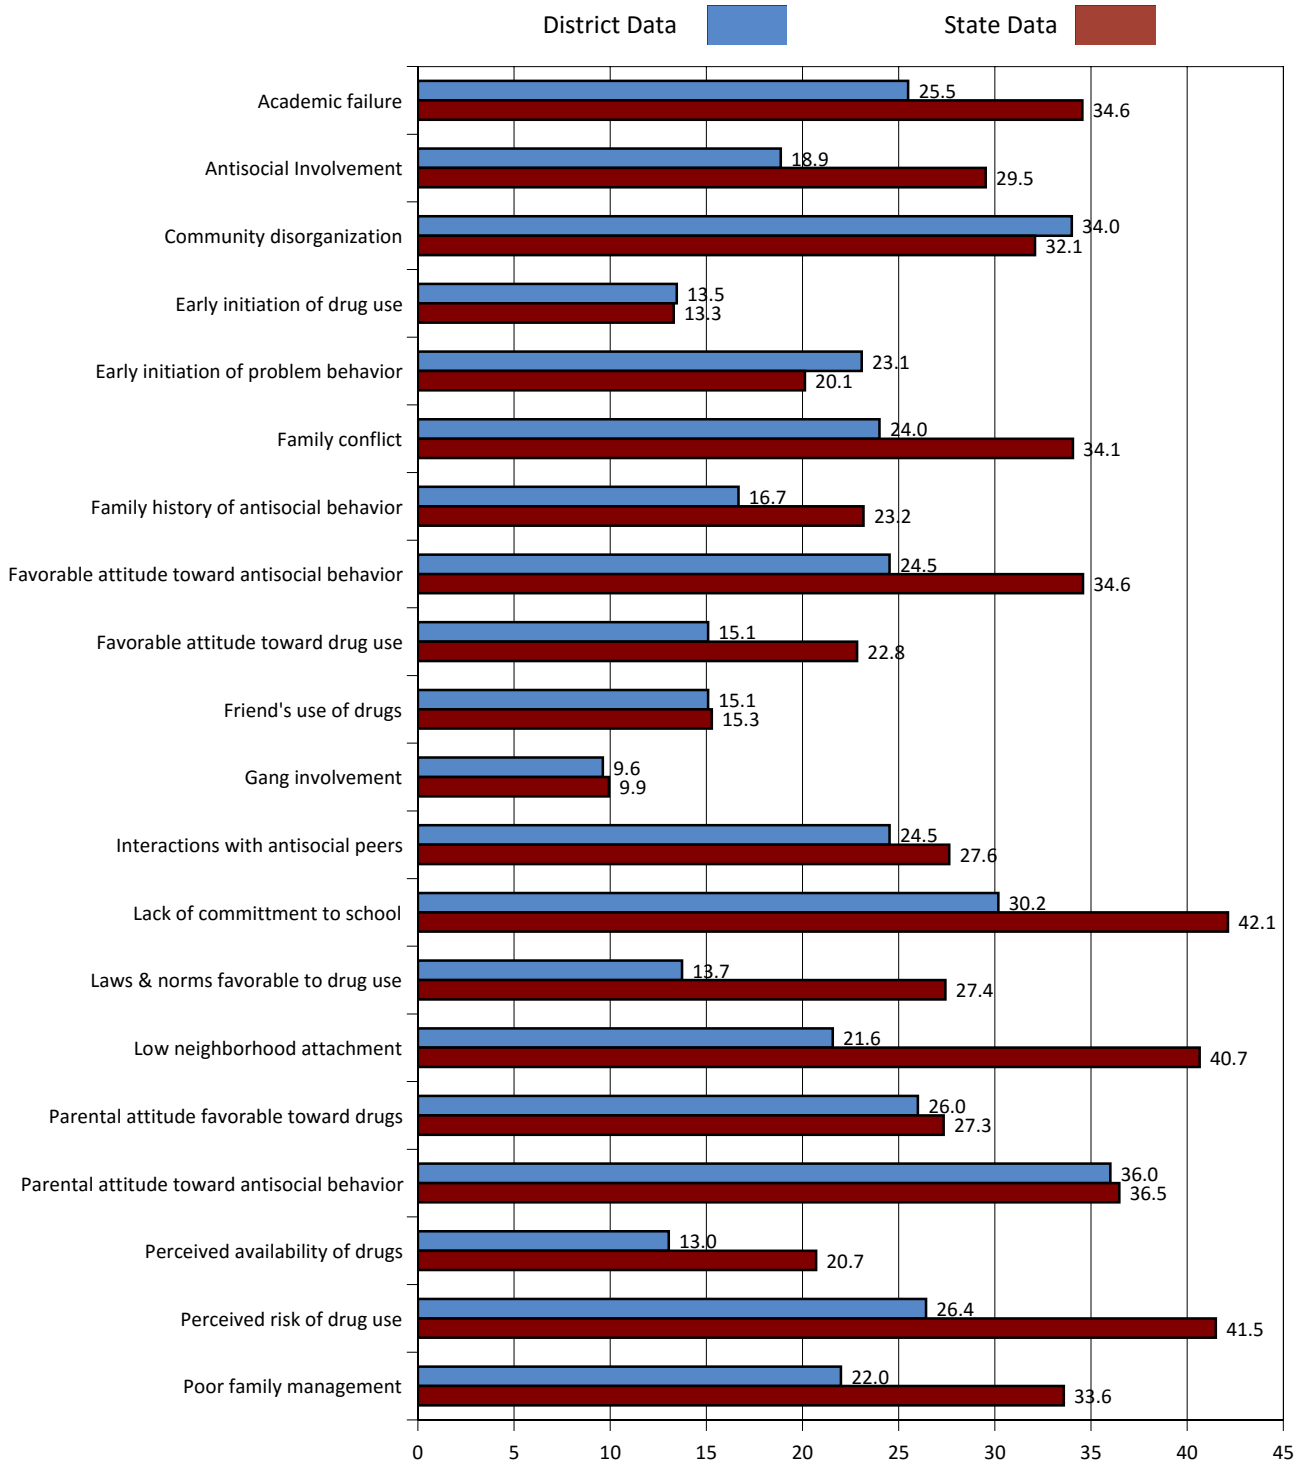
Protective Data Profile

Protective Factors are those factors that, when present in a young person's developmental environment, buffer and protect him/her against development of health and behavior problems. Higher percentages are desired.



Risk Data Profile

Risk Factors are those specific aspects or conditions of a youth's life experiences that increase the likelihood that he/she will engage in negative or antisocial behavior in adolescence and/or young adulthood. Lower percentages are desired.



Understanding the Data

As you compare data, it can be helpful to examine trends by cohort group in addition to trends by year. For example, students in the 2015-16 cohort are the same students as in the 2013-14 cohort.

Substance Use Data
