Sample County

Kansas Communities That Care Student Survey Community Report

Community Reports are only generated for communities with greater than 48% participation. 2023 Participation Rate: 54.75%

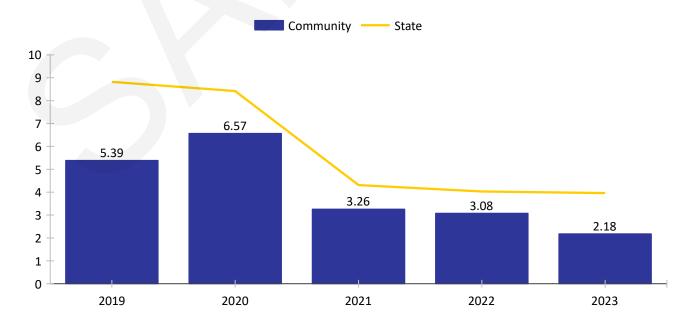

30-Day Alcohol Use

The percentage of students in grades 6, 8, 10, and 12 reporting any use of alcohol within the past 30 days (Percent data)

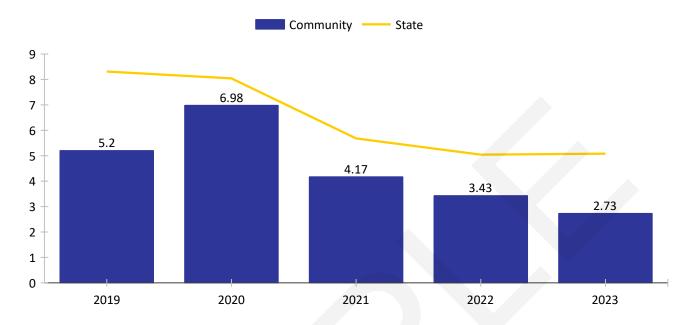

Two Week Binge Drinking

The percentage of students in grades 6, 8, 10, and 12 reporting having five or more drinks in a row on at least one occasion within past two weeks (Percent data)

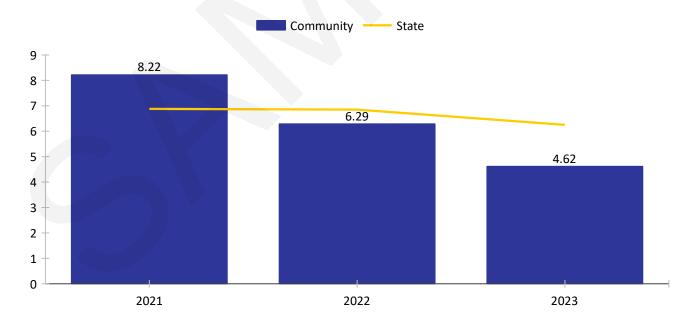

30-Day Binge Drinking

The percentage of students in grades 6, 8, 10, and 12 reporting having five or more drinks on the same occasion at least once within past 30 days.

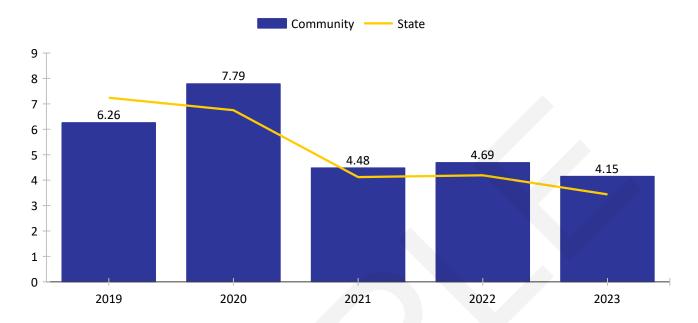

30-Day Vape Use

The percentage of students in grades 6, 8, 10, and 12 reporting any use of vaping products within the past 30 days (2018-2020 e-cigarettes) (Percent data)

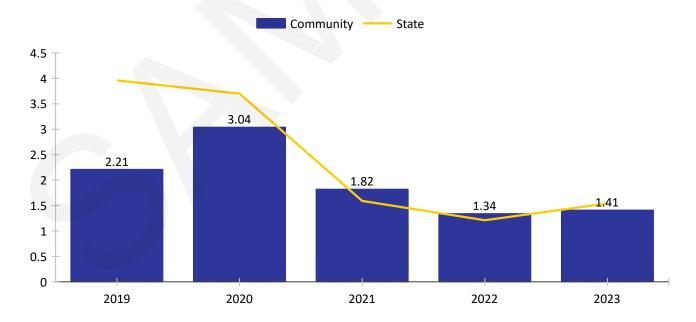

30-Day Marijuana Use

The percentage of students in grades 6, 8, 10, and 12 reporting any use of marijuana within the past 30 days (Percent data)

30-Day Prescription Medication (Any) Misuse

The percentage of students in grades 6, 8, 10, and 12 reporting any use of prescription medications (stimulants, tranquilizers, or pain relievers) without a prescription within the past 30 days (Percent data)

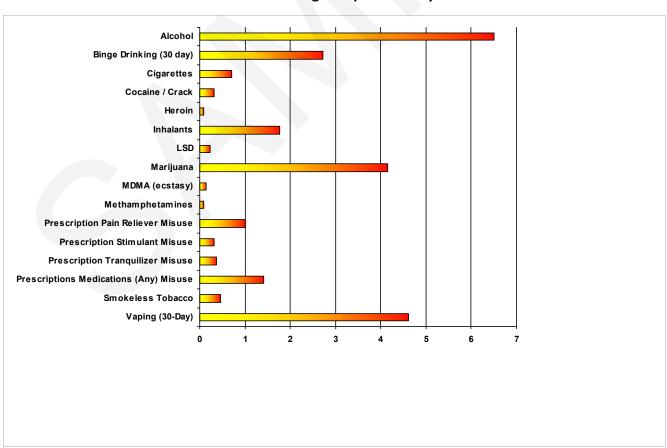

30-Day Use - All Substances

Yellow highlights with red text indicate areas of concern where the state comparison or community trend is moving in an undesirable direction. An empty space indicates < 20 or <25% of students participated.

Substance Use Percent of 6th, 8th, 10th, 12th Graders who report any use in the past 30 days.	Community Curent Year 2023	Kansas 2023	Compare to State	Community Change 3-5 Year Trend
Alcohol	6.50	8.92	-2.42	Decreasing
Vaping (30-Day)	4.62	6.25	-1.63	Decreasing
Marijuana	4.15	3.44	0.71	Level

School Opportunities for Involvement	75.89	77.23	-1.34	Increasing

Sample County Risk Factor Profile

The following is a list of risk factors correlated with youth substance use. Risk factors for alcohol, marijuana, and vaping are shown as they have been identified by the Kansas Department for Aging and Disability Services (KDADS) as priority areas of focus. Implementation of evidence-based prevention strategies can produce a direct change in youth substance use which can be tracked by these measures. Use the following pages to help assess and guide community prevention efforts.

This gauge shows how your community compares to the Kansas county with the highest score in the state for this indicator. A dial in the green area indicates a desirable comparison. A dial in the yellow area indicates a neutral comparison. A dial in the red area indicates an undesirable comparison.

These icons indicate the direction in which your community is moving from year to year. Green indicates a desirable change. Yellow indicates minimal change. Red indicates an undesirable change.

These icons indicate how your community compares to the Kansas state average. Green indicates a desirable comparison. Red indicates an undesirable comparison. Yellow indicates a similar comparison.

Risk Factors

* Data sorted from high to low based on comparison to other participating counties. Lower values are the more desirable*

Laws & Norms Favorable to Drug Use (Alcohol)

The percentage of youth in grades 6, 8, 10, and 12 who report that if a kid drank some alcohol in their community, they would NOT be caught by the police.

Fentanyl Awareness

For the 2023 Kansas Communities That Care (KCTC) Student Survey administration, two questions regarding fentanyl were piloted. The purpose of these questions is to gauge awareness of fentanyl and perceived risk of harm from fentanyl use.

The first question asked, "How much have you heard about fentany!?" and students were given three options:

- 1. I have not heard about fentanyl.
- 2. I have heard about fentanyl, but I do not know what it is.
- 3. I have heard about fentanyl, and I know what it is.

Students that answered "I have not heard about fentanyl" did not receive the second question about perceived harm.

The second question asked, "How much do you think people risk harming themselves (physically or in other ways) if they take fentanyl accidentally or on purpose?" Students were given four options:

- 1. No risk
- 2. Slight risk
- 3. Moderate risk
- 4. Great risk
