Introduction

The Kansas Communities That Care (KCTC) Student Survey is administered annually for use by schools, communities, counties, and state agencies in Kansas to monitor the incidence and prevalence of adolescent behaviors. The survey is supported by the Kansas Department for Aging and Disability Services / Behavioral Health Services, and is available to all Kansas school districts to support healthy youth development. The Kansas framework expands the Communities That Care risk and protective factor model based on practical applications and experience concerning what places children and youth at risk, what buffers against those risks, and knowledge about how communities and systems change.

About This Report

This report summarizes findings from the 2025 Kansas Communities That Care (KCTC) Student Survey, administered to students in the 6th, 8th, 10th, and 12th grades between October, 2024 and January 31, 2025.

Approximately 20% of eligible Kansas students participated in the survey in 2025. There were over 29,000 surveys submitted from 166 districts and private schools. The participation rates for your district are presented below with comparisons to your county and the State of Kansas.

Participation Rate

Survey participation rates are provided in the table below. If response rates are low, bias may result; therefore, caution should be used in data interpretation. Data shown in this report is that of the following grade group: **All grades**

	6th Grade:	8th Grade:	10th Grade:	12th Grade:	Total:
Sample District	63.9%	86.8%	79.7%	2.1%	59.5%
Sample County	49.7%	54.1%	69.1%	32.5%	52.0%
State of Kansas	23.8%	23.6%	19.3%	14.5%	20.2%

Districts can also access complete data and create simple reports online at www.kctcdata.org, comparing districts to county or state averages. State and county data is publicly available online; however, access to district- or building-level data are confidential. Superintendents receive access to confidential local results and may grant access at their discretion. If you have any problems accessing your data, or need assistance navigating the website, please send an e-mail to kctc@greenbush.org or call 620-724-6281, ext. 366.

In the next section of this report, you will find a Risk Factor Profile and a Protective Factor Profile to assist with evaluation of all the Risk and Protective Factor data from the Kansas Communities That Care Student Survey.

Risk and Protective Factor Details

Risk Factors (desire downward trend / negative comparison)

Risk Factors are those specific aspects or conditions of a youth's life experiences that increase the likelihood that he/she will engage in negative or antisocial behavior in adolescence and/or young adulthood. Scales are rank ordered by local score. Values highlighted indicate potential areas of concern. Risk factor scales are comprised of multiple questions aggregated to represent the percentage of students at risk for each factor.

Scale Data shown is that of the following grade group: All Grades	Local Scale Scores	KS Scale Scores	Compare to State	Change From Previous Year to Current
Low Commitment to School	48.03	54.75	Lower	Increasing
Favorable Attitudes to Antisocial Behavior	39.84	44.90	Lower	Increasing

Understanding the Data

As you compare data, it can be helpful to examine trends by cohort group in addition to trends by year. Students who are in the 12th grade in 2024-25 are students who would have been in the 10th grade in 2022-23 and in the 8th grade in 2020-21.

Alcohol-Related Questions
