

2022

During the summer of 2020, stakeholders were engaged in a process to prioritize improvements to the Kansas Communities That Care (KCTC) Student Survey. In addition to parents, students, counselors, and administrators, Greenbush considered recommendations documented by the Attorney General's Suicide Prevention Task Force, the Kansas Mental Health Advisory Council, and the Kansas Blue Ribbon Task Force on Bullying.

From this process, two primary goals were established for the 2021 survey administration.

1. reduce the length and time required for administration
2. expedite reporting survey results for use by school, community, and state stakeholders

Online administration of the statewide survey began in 2009. By 2020, 93% of districts utilized the online option. As plans formed to end the use of paper surveys, the pandemic accelerated transition to fully online administration in 2021. This important milestone unleashed multiple opportunities to improve administration protocols.

To reduce the amount of time required to complete the 2021 survey, 35 questions were removed and language was modified to improve readability. An updated survey platform allowed the use of logic to skip past questions based on previous responses.

Improvements will continue based on annual review of processes, stakeholder input, and feedback from student focus groups.

The Kansas Communities That Care (KCTC) Student Survey is built on a prevention framework to inform local and state programs, policies, and practices and support healthy youth development. Greenbush administers KCTC on behalf of the Kansas Department for Aging and Disability Services (KDADS).

2022 KCTC Student Survey results were published online March 11th.

OVER
64,000
student responses

Results published earlier than ever before

244 PUBLIC & PRIVATE
school districts participated

43%

Nearly 43% of eligible 6th, 8th, 10th, & 12th graders participated

IMPROVED READABILITY

Language was modified to make questions easier to read

SKIP LOGIC REDUCES # OF QUESTIONS

This feature changes what question or page a respondent sees next based on how they answer the current question. The result is fewer questions for most students.

THE SURVEY TAKES APPROXIMATELY 27 MINUTES TO COMPLETE

On average, KCTC requires about two hours of students' time throughout their entire K-12 educational experience.

SUICIDAL THOUGHTS, PLANS & ATTEMPTS IN THE PAST YEAR REPORTED BY STUDENTS IN 2022

- 19% seriously thought about killing themselves
- 13% made a plan to kill themselves
- 5% tried to kill themselves

*NEARLY 60,000 KANSAS STUDENTS RESPONDED TO OPTIONAL QUESTIONS ABOUT DEPRESSION & SUICIDE QUESTIONS IN 2022

38%

38% of students surveyed reported feelings of depression in the past year

The percentage of Kansas students surveyed who reported feelings of depression has been increasing since we began asking in 2016.

DATA ILLUSTRATES RESPONSES FROM STUDENTS SURVEYED IN 2022 WHO ANSWERED EACH QUESTION

PERCENTAGE OF STUDENTS SURVEYED WHO REPORTED FEELINGS OF DEPRESSION BASED ON HOW FREQUENTLY THEY WERE BULLIED

Kids who reported being bullied daily reported feelings of depression nearly twice as much as kids who reported they had never been bullied.

Being bullied once or twice a month also showed higher reported levels of depression.
